

BEST PRACTICE-stucco finish

Review specifications for job

Review prints with Project Manager

Check colors and textures with the Project Manager

Project Manager to order finishes and colors

Laminated color charts for the field by Project Engineer

Setup, SWIPP-diagram #3

Receive materials from suppliers and verify that colors and textures match approved mock ups

Check mixer prestart procedure/check oil, cracks, and anything broken

Never remove any safety devices

Add water, mix in color packs – One color pack per one sack of base material

Add in finish base, make sure gradation of sand matches specs. (Size of sand) approved by mockup

Temper finish to suit so plasterers have a workable mixture

Repeat same mix design to ensure same looking finish

Repeat until wall is completed

Wash mixer and dump all waste into a wash out bin
